SUMMARY

Full Stack Engineer with overall **2** years of experience building scalable MERN applications and real-time features. Experienced in LLM integrations, frontend engineering, and delivering production-ready systems.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, HTML5, CSS3, Python, SQL

Frameworks/Libraries: React.js, Redux, Node.js, Express.js, Tailwind CSS

Databases: MongoDB, MySQL, Firebase, Supabase

AI / LLM: Gemini LLM Integration, Prompt Engineering, OpenAI, Claude Code, Cursor AI, Agentic AI

Tools: Git, GitHub, VS Code, Postman, Netlify, Render, Vercel, Figma, Vite, Babel

Concepts: REST APIs, Real-time Systems, Responsive Design, SDLC, Problem Solving

WORK EXPERIENCE

AI Product Engineer [Full Stack]

Jan 2025 – Present

Colligence Research, Bangalore, INDIA

- Developed a real-time AI-based avatar generation system for **Circle App**, improving user engagement through animation.
- Built multi-account isolated user profile picture workflows with AI-powered passport photo generation.
- Integrated **Gemini LLM** to automate image-to-avatar transformation with dynamic motion rendering.
- Maintained seamless real-time avatar consistency across macOS, Android, and web environments.
- Collaborated closely with product and engineering teams to deliver stable, production-grade AI features.

Full Stack Trainee

June 2024 – Nov 2024

Masai School, Remote

- Designed **Aabhar**, a full-stack crowdfunding platform supporting campaign creation and contributions.
- Built frontend with React Router, Hooks, and Tailwind CSS, and developed backend APIs using Node.js, Express, and MongoDB.

Frontend Intern

August 2023 – October 2023

Minzor Pvt Ltd, Remote

- Contributed to the development of **UniMart**, a real-time e-commerce web application with dynamic product listings.
- Skilled in HTML (semantic, forms, local storage), integrated Firebase authentication, and improved UI performance and cross-browser compatibility in a team.

PROJECTS

Document Processing Pipeline — AI-Powered PDF Analysis Tool

[GitHub](#) — [Demo](#)

- Built a full-stack PDF document analysis application where users upload any PDF and receive an AI-generated summary, key topics, and document classification using Google Gemini.
- Developed with Next.js, FastAPI, LangChain, LangGraph, Tailwind CSS.

Veterinary Chatbot

[GitHub](#) — [Demo](#)

- Built a production-ready Veterinary Chatbot SDK with embeddable script integration, enabling AI-powered pet care assistance and appointment booking for veterinary clinics.
- Architected a full-stack solution using React, Node.js, MongoDB, and Google Gemini API with session management, rule-based booking flow, and strict veterinary-only response filtering.

EDUCATION

Masai School

Full Stack Development

Bangalore, India

2024–2025

Asian School of Business

Bachelor of Computer Application (BCA) – 75.6%

Noida, India

2021–2024
